

As a (Senior) Machine Learning Engineer, you ensure that machine learning solutions are applied in practice at Chrono24. We offer you the opportunity to combine modern techniques with the vast data resources of a global marketplace. You will have the chance to apply both new research methods and proven techniques in scalable, real-world applications. With your help, users will see more relevant products, our merchants will achieve greater success, our teams will work more efficiently, and Chrono24 will remain a safe marketplace for everyone.

(SENIOR) MACHINE LEARNING ENGINEER (ALL GENDERS)

Location: **Karlsruhe** Type of Job: **Full-time employee** Entry Date: **immediately**

[APPLY NOW](#)

What you can expect

- As part of the agile Data Science/ML team, you are responsible for software development related to the topic of machine learning.
- You will encounter a wide range of subject areas, such as recommender systems, intelligent search, image and text classification, or time series forecasting.
- You will be co-responsible for the implementation and operationalization of our data-driven projects based on modern ML-Ops concepts.

What sets you apart

- You have a degree in (Business) Informatics, Mathematics, or a comparable education.
- You are familiar with relevant Python ML frameworks (e.g., scikit-learn, pandas, PyTorch/TensorFlow) and also have experience with SQL and object-oriented programming.
- You have a strong interest in the latest developments in machine learning and AI and are able to assess their potential for enhancing our product and internal processes.

- You will drive the integration of ML solutions to optimize our internal processes in close collaboration with other departments and increase the value for our users, for example, by connecting external LLM services.
- You already have experience in the development and practical application of machine learning solutions and modern ML-Ops concepts, ideally both on-premise and in the cloud.
- You also bring solid experience in classical software development, including knowledge of software architecture, design patterns, and clean code principles, which are essential for developing robust, maintainable, and scalable systems.
- You work independently and support the ML team both technically and with your commitment to advancing projects and fostering a positive team culture.
- You are motivated to learn more about luxury watches, marketplaces, and e-commerce and to apply your expertise in ML/AI in a dynamic environment.
